MINA YEE

Mina Yee is a visual artist from South Korea, based in The Hague. Mina's works revolve around what human values are and when they come into contact with technology, often exploring things that matter, hope for survival and for sustainable futures. Her recent work, (three-channel video installation, 27min 29sec) is that brought her background story intact. In the first part, small pieces of photos are from the family album and the story is told to the audience about what she saw and felt when she grew up with them. In the second part, a girl living with Amazon's artificial intelligence speaker 'Alexa' recognizes prejudice caused by algorithms and asks Alexa questions. AI - our projection of the future - still internalises the patriarchal femininity she has seen in the past. How can we picture our future with such AI?
